MIT License Host: how it is put together

sketched from the files

MIT License Host: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed.

Product map: what MIT License Host is for

WHAT IT IS

A small project in Markdown. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: README.md, banner.png, logo.png.

WHAT COMES OUT

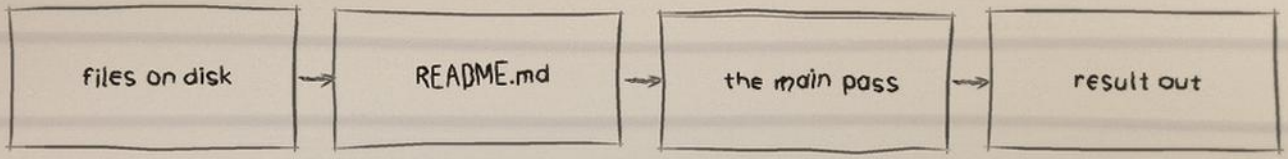

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

MIT License Host: data flow, in one direction

One direction. Anything the code does not do is not drawn.

second sheet, GK

MIT License Host in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

4 files in the tree.

5 commits, first 2023-02-25, last 2026-10-30, from the local git log.

No test files by name in this snapshot.

counted and drawn, GK

MIT License Host: schematic of the apparatus

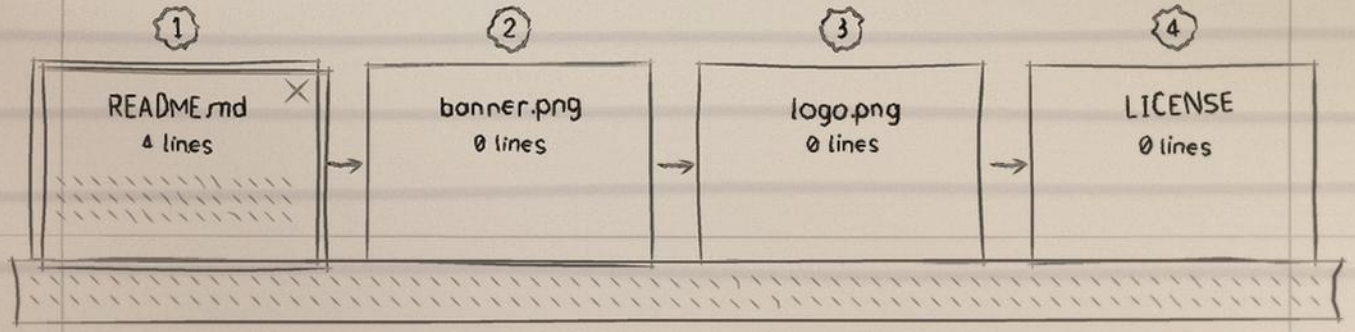

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. README.md
2. banner.png
3. logo.png
4. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 4 files, 4 lines counted

turns of the crank so far: 5 commits, 2023-02-25 to 2026-10-30

measured and sketched,
